

OUR CORPORATE MORAL VALUES;

We Must Implement Willful Policies Using the Power of Science and Technology

At ZECA BANK®, we develop effective solutions based on rigorous research, collaborating with scientific experts, scientists, R&D staff, and the world's most experienced technical and financial experts.

At ZECA BANK® by collaborating with these stakeholders, we create programs and methodologies that reflect the latest scientific advances, incorporate the latest technologies, and are based on the best available data, making our programs not only effective but also reliable and impactful.

This approach helps strengthen the foundations of Voluntary Carbon Management by setting an example for supporting reliable and measurable results.

Developing My Excellence, Developing the Green World,

At ZECA BANK®, we are committed to addressing the world's environmental and social challenges through our policies and actions. We believe that voluntary carbon reduction is one of the most effective and efficient ways to do this, and we are committed to establishing rigorous and robust standards programs that form the foundation of these future carbon markets. Our standards programs ensure the sustainable, secure, and data-efficient development of these markets by reliably measuring and certifying the impact of various activities, such as preventing deforestation, reducing carbon, and reducing plastic waste.

At ZECA BANK®, we know that meaningful progress requires the bold steps we are taking today with our valued stakeholders. In the face of a serious global climate emergency, waiting for perfect solutions is not an option. However, we have embraced the principle that, through science and technology, planning and measuring time and targets effectively, and establishing standards based on these objectives, is the most effective way to create a green world based on measurable and trustworthy factors. We have embarked on this journey.

Monitoring and Measurability of Climate Change Solutions

ZECA BANK® is the most accurate and valuable voluntary carbon registry bank for combating climate change and financing sustainable development. It directs all resources to important and valuable interactions, such as protecting our world's ecosystems, strengthening human communities, and reducing emissions.

We Guarantee a Green Journey to the Future with Our Vision

Our vision at ZECA BANK® is to create a very transparent, fair and sustainable future for all, by ensuring that all working procedures and mechanisms are measurable, and that we reduce the impacts as much as possible as part of a mobilization to minimize climate change and to provide a data bank that can be measured, monitored and continuously monitored for the future.

Achieving Equality and Social Benefit by Protecting Nature

ZECA BANK® is driven by a sense of responsibility towards the world and its people, guiding all its activities to be beneficial and beneficial to nature and the environment. ZECA BANK®'s programs establish a roadmap for the equitable sharing of project benefits among stakeholders, including Indigenous peoples and local communities, who are vital custodians of the ecosystems we aim to protect and are often most affected by climate change.

Transparent and Verifiable Working Organization with 3rd Party Stakeholders

In its Voluntary Carbon Verification and Assessment activities, ZECA BANK® encourages all its third-party stakeholders to minimize carbon emissions, minimize energy consumption, provide green environment, and provide sustainable working opportunities, thus encouraging all stakeholders to comply with climate change and the UN Development Goals, and works towards achieving these incentives.
